

# Kitchen Extension

The kitchen was being extended to provide a dining area and family room. Our client's preference was a neutral colour scheme with one strong accent colour. The kitchen space had to provide adequate storage and best use of space without the over fitted look. The design needed to stand the test of time, as well as provide a kitchen that was easy to clean.

The final design was based around a predominantly fitted kitchen with base cabinets in oak and wall cabinets, painted in a lighter shade of the wall colour. The larder cabinet in the corner provides ample storage for groceries, food processor and large serving dishes to recycling boxes. The coordinating sideboard is free

standing. The dark cranberry accent colour is used in the full length toile de joue curtains in the extension and the bespoke leather dining chairs.
